AIX ROUNDTABLES

RISIN VENTURES

MONDAY 14 DECEMBER 2026 | DOHA, QATAR | 14:00 TO 18:00

Where AI moves from ambition to action.

AI has moved past experimentation. The questions that matter now are about execution: where to deploy it, how to secure and govern it, what infrastructure it needs, and how to turn investment into measurable value. AIX Summit 2026 brings the leaders responsible for those decisions into six focused conversations, with no keynotes, no panels and no stage.

6 executive roundtables

15 guests at each table

12 curated AI startups

1 afternoon in Doha

Six tables. Choose your conversation.

Each roundtable runs for 90 minutes under the Chatham House Rule. A senior chair opens with a short perspective, and an experienced AIX moderator guides 75 minutes of candid discussion: where AI is working today, what is holding back scale, and which decisions lie ahead in the next 12 to 24 months. The final 15 minutes belong to two startups, selected for that room, demonstrating working products that address the problems just discussed.

SESSION 1 | 14:30 TO 16:00

1 AI in Banking & Financial Services

The AI-Powered Financial Institution

Where is AI creating real competitive advantage in financial services, and what is still hype?

2 AI in Government

Building an AI-Ready State

How do governments move from AI strategy to AI-powered public services and economic value at scale?

3 Investment in AI

Capital, Valuation & Enterprise ROI

Where is institutional capital flowing across the AI stack, and how are enterprise buyers measuring genuine return on investment?

SESSION 2 | 16:30 TO 18:00

4 AI Security & Governance

Can We Trust AI to Act?

What security controls and governance does an organisation need before it lets AI touch sensitive data, systems and decisions?

5 AI Infrastructure & Sovereign AI

Building Qatar's AI Stack

What compute, data and model foundations does Qatar need to own, and what can it rent, to run AI at national scale?

6 AI in Healthcare

From Pilot to Patient

Where is AI improving patient outcomes and clinical capacity today, and what stops it scaling safely across a health system?

14:00 Arrival, coffee and first look at the startup booths

14:30 Roundtable Session 1: three tables in parallel

16:00 Networking break with both sessions and all 12 startups

16:30 Roundtable Session 2: three tables in parallel

18:00 Booth visits and informal networking until 18:30

Who takes a seat

CEOs, CIOs, CTOs, CDOs and COOs. Heads of AI, digital transformation and innovation. Leaders from banking, insurance and investment, government and regulators, energy, healthcare, telecom, aviation and logistics. Every table is curated so that each guest brings a perspective the conversation needs.

Your afternoon, your choice

Reserve one table in Session 1, one in Session 2, or one in each and stay for the full afternoon. Each table seats 15, and every request is reviewed by the AIX team to keep the room senior and balanced.

The conversation continues

Insights from all six tables are distilled into AIX Roundtable Signals, an anonymised report published in January 2027. Guests also receive introductions to the startups they want to meet within five working days.
